

Crews'n Healthmobile

Thousands of youth live on the streets of Phoenix, many in desperate need of medical treatment. They are in danger of illness, injury, and depression. Most of these youth don't have health insurance and can't get the healthcare they need.

Who We Serve

The Crews'n Healthmobile treats children and young adults through the age of 24 who say they are homeless or at risk of being homeless. We treat patients regardless of insurance status and ability to pay.

Please contact us at (602) 933-9339, Option 2 to make an appointment. Walk-ins welcome upon availability.

Who We Are

Since March 2000, the Crews'n Healthmobile has been serving children and young adults surviving on the streets who were not receiving the medical care they need. Our mission is committed to providing hope and holistic healthcare with respect and heart to homeless and at-risk youth.

What We Do

The Crews'n Healthmobile brings free medical care directly to this special population. The program's mobile medical units and fixed site clinics operate Monday through Friday at numerous sites across the Valley. The mobile medical units travel to areas where homeless and at-risk youth and young adults are known to gather, including schools, drop in centers and transitional housing facilities.

What We Offer

- full examinations, including adolescent and young adult care
- immunizations
- dispensing of medications
- testing and treatment for pregnancy and sexually transmitted infections
- minor surgical procedures
- health education
- referrals to sub-specialists if needed
- behavioral health screenings, evaluation, therapy and referrals as needed

The staff also educates and counsels youth and young adults on:

- Adolescent Sexuality including counseling on Safe Sex and Treatment of Sexually Transmitted Infections
- LGBT, Transgender, or Gender Variant healthcare including topics of Gender Dysphoria, hormone replacement therapy, and dangers of seeking hormones in non-traditional ways
- Behavioral Health including suicide risk, substance abuse, depression, and self-harm
- Pregnancy
- Smoking cessation
- Nutrition
- Safety issues, violence, and injury prevention
- Self care
- Bullying
